

MUHAMMAD SHAMAIM

Faisalabad, Pakistan | +92 309 1061816 | shamaim1816@gmail.com

Portfolio: <https://muhammad-shamaim-portfolio.vercel.app/>

Professional Summary

Software Engineering graduate with a **CGPA of 3.85/4.00** and over three years of teaching experience in Computer Science. Contributed to the design, documentation, system analysis, and development-related activities of academic and practical software projects, including an **AI-powered Resume Ranking System** and an **AI-powered Wine Recommendation System**. Familiar with Python, FastAPI, PostgreSQL, React.js, JavaScript, NLP, BERT, Git, and software engineering practices. Strong foundation in object-oriented programming, database systems, requirements analysis, technical documentation, and problem solving. Seeking an entry-level **Software Engineer / Web Developer** position to apply technical knowledge and grow through practical software development.

Core Skills

- Problem Solving
- Analytical Thinking
- Technical Documentation
- Requirements Analysis
- Team Collaboration
- Communication & Presentation
- Quick Learning
- Teaching & Mentoring
- Time Management

Education

BS Software Engineering

2022–2026 | CGPA: 3.85/4.00

HSSC (Pre-Engineering), 2022 | 953/1100

SSC (Science), 2020 | 1023/1100

Technical Skills

Programming: Python, JavaScript

Web Development: HTML5, CSS3, React.js

Backend: Python, FastAPI

Database: PostgreSQL

AI / NLP: Natural Language Processing (NLP), BERT, Semantic Matching

Software Engineering: OOP, SDLC, Requirements Analysis, System Analysis, Technical Documentation, Software Testing

Version Control: Git, GitHub

Tools: Visual Studio Code, Microsoft Office

Projects

VINO — AI-Powered Wine Recommendation System

- Contributed to the development of an AI-powered wine recommendation system designed to recommend wines based on user preferences and food pairing.
- Worked on a **food-image recognition and recommendation workflow**, allowing users to upload a food image and receive suitable wine recommendations.
- Worked with a web-based application architecture involving frontend, backend, database, and AI-powered recommendation functionality.
- Implemented and worked with wine recommendation features including **wine search, filtering, ratings, reviews, wine details, and recommendation explanations**.
- Worked on recommendation scoring and factors such as **food pairing, wine rating, user preference, favorites, budget, and season**.
- Contributed to debugging frontend and backend integration issues and improving the recommendation user experience.
- Technologies: **React.js, JavaScript, Node.js/Express, PostgreSQL, AI/Image Recognition, Git**

AI-Powered Resume Ranking System | Final Year Project

- Developed an AI-powered system that compares multiple resumes against a given job description and produces a ranked list of candidates.
- Contributed primarily to **system analysis, software design, requirements analysis, technical documentation, and project documentation**.
- Worked with the team on documenting system architecture, workflows, use cases, requirements, testing procedures, and user interactions.
- The system uses **NLP and BERT-based semantic analysis** to understand the contextual similarity between resumes and job descriptions.
- Resume ranking considers factors such as **skills, experience, and semantic similarity**.
- Used semantic similarity techniques to identify relevant candidates beyond simple keyword matching.
- Technologies: **Python, FastAPI, PostgreSQL, React.js, NLP, BERT, Git**

Interests

- Web Development
- Artificial Intelligence
- Learning New Technologies
- Problem Solving

Professional Experience

Academy Teacher (2022-present)

- Teach Computer Science and related programming concepts to students.
- Prepare lessons, exercises, assessments, and learning materials according to student requirements.
- Explain programming concepts and problem-solving techniques in a clear and practical manner.
- Guide students in understanding programming fundamentals and solving technical problems.
- Manage classroom activities while maintaining an organized and productive learning environment.

RELEVANT COURSEWORK

- Object-Oriented Programming
- Data Structures & Algorithms
- Database Management Systems
- Software Engineering
- Web Engineering
- Computer Networks
- Operating Systems
- Requirements Engineering
- Artificial Intelligence
- Natural Language Processing
